

# Even Borcal

MADE IN SPAIN

It is a fertilizer containing the two elements: calcium and boron, which are essential for the protection of many plants and compensate the lack of nutrients, which reflects in growth and yield rates.

In addition, it is easily mixed with water and is non-toxic compound when applied directly onto plants.

## ADVANTAGES

1. Easy absorption due to its small molecules.
2. A passage for mineral salts to pass through cuticle layer and cell-wall membranes into plant cells.
3. This compound is used to prevent and eliminate symptoms of element decrease in vegetable and fruit crops, for example:
  - Septoria.
  - Physiological drought in melon and watermelon.
  - Bacterial rot.
  - Tipburn of lettuce.
  - Pepper rust.
  - Improving plant tissue consistency and quality traits.
  - Increasing pollen fertility due to its association with calcium in the presence of boron.
  - Increasing sugar content.
  - Increasing olive tree fruiting.

## ACTIVE INGREDIENTS

- Soluble calcium 11.2% (In the form of Calcium Oxide)
- Boron liquid 0.75% (In the form of Boron)
- Free amino acids 8%
- Nitrogen 1.6%
- Organic matter 12%

## DOSAGE AND USE

### Foliar Spray

- 400 - 800 cm<sup>3</sup>/Feddan. It can be applied up to 5 times (at 100-200 cm<sup>3</sup>/100 L of water and at 150 - 250 L/Feddan).

### Soil application

- It is applied to soil using fertilizer equipment at 2 - 6 L/feddan divided into 2 - 3 irrigation phases.

Packages  
0.5 - 1 - 5 L
