

# Global Amino Feed

Global Amino Feed Plus is an improved formula supported by Cytokinin hormone; a youthful enzyme for plants. It builds proteins and chlorophyll, prevents plant yellowing, promotes cell division, increases lateral buds and gives strong shoot growth that terminates the rest phase of fruit plants, leading to early fruiting, in fruits such as mango, when it is mixed with gibberellic acid.

## ADVANTAGES

- Increases soil's ability to retain water.
- Increases the cation exchange capacity of soil.
- Improves soil properties, increases ventilation and adjusts pH level.
- Increases plant's ability to absorb nutrients and reduces fertilizer wastage.
- Natural plant growth regulator that increases its natural immunity against soil and shoot system diseases.
- Activates photosynthesis and increases carbohydrate stock in plants.
- Increases soil's ability to build protein.
- Improves the enzymatic system in the plant.
- Strengthens root system and enhances its ability to branch and penetrate into soil.
- Increases yield of leafy green vegetables.
- Increases production of seed crops.
- Increases efficiency of fertilizers and pesticides.
- Rich with amino acids extracted from plants with strong influence on the enzymatic activity of the plant, which are responsible for raising the efficiency of plant photosynthesis to build protein. It helps plant to absorb different nutrients and increases the plant's natural resistance to many fungal diseases and abnormal weather conditions.

## ACTIVE INGREDIENTS

- |                  |         |             |        |
|------------------|---------|-------------|--------|
| • Amino Acids    | 20 %    | • Zinc      | 500ppm |
| • Ascorbic Acids | 4%      | • Manganese | 500ppm |
| • Citric Acid    | 10%     | • Magnesium | 500ppm |
| • Nitrogen       | 6%      | • Copper    | 500ppm |
| • Phosphorus     | 5%      | • Boron     | 100ppm |
| • Potassium      | 6%      | • Cytokinin | 25ppm  |
| • Iron           | 1000ppm |             |        |

## DOSAGE AND USE

- **150 cm<sup>3</sup>/200 L of water, spray once every 15 - 20 days:**  
Spray shoot throughout the period of activity until the time of harvesting.
- **150 cm<sup>3</sup>/200 L of water:**  
Spray shoot throughout the period of activity once every 15-20 days.

Packages  
0.5 - 1 - 5 L
