

# Global Potaplanet

Global Pota Planet is a unique and sophisticated formula, it uses raw materials with European roots that supply plants with their potassium needs. It achieves the best results with all kinds of agricultural and horticultural crops, vegetables and fruits.

## ADVANTAGES

- Global Pota Planet is an effective formula in the regulation of respiration, transpiration and maintenance of the water condition of the plant, by opening and closing the stomata, regulating the cellular pressure and filling cells, helping the plant resist diseases, drought, cold and soil salinity.
- Global Pota Planet is essential for the growth of both lignin and cellulose, which increase the thickness of the epidermis layer of plant cells and thus, increases its resistance to leaning, insects and diseases.
- Global Pota Planet is most important for root crops, for its role in the transfer of carbohydrates from places of formation to places of storage and thus, transferring substances manufactured in leaves for storage in roots, which are the economic parts of the plant.
- Global Pota Planet is a formula that stimulates more than 60 enzymes, such as synthesis and photosynthesis enzymes.
- Global Pota Planet increases the activity of enzymes involved in the synthesis of peptide bonds and conversion of carbohydrates into proteins, activation of building, transporting and storing carbohydrates in storage tissues such as tubers, corms, fruits and grains.
- Global Pota Planet increases the activity of enzymes that reduce plant, and thus, preserves plant cell pH.
- Global Pota Planet helps plants resist dieback disease.

## ACTIVE INGREDIENTS

- Potassium (K) 38%
- Citric acid 15%

## DOSAGE AND USE

Crop	In 100 Liters of water
Fruit and olive trees in fruit growth stage	200 cm
Grapes at the beginning of fruit emergence phase between 3 and 4 times	200 cm
Citrus trees in the stage of growth activation and maturity	200 cm
Vegetables - tomatoes - cucumber - beans - pepper	150 cm

Packages  
0.5 - 1 - 5 L
